The proceedings of the meetings held on the 2nd and 16th March 1918, respectively, were read and confirmed.

Deferred propositions.

1. Government Proceedings No. 3783-5—Ml. 150-16-4, dated the 15th January 1918, passing orders and calling for the views of the Municipal Council on the observations and suggestions made by the Sanitary Commissioner on the malarial survey of the City.

Also Health Officer's memo No. 1288, dated the 1st March 1918 on the subject.

Resolution.—There are sufficient data at the disposal of the Municipal Council for the adoption of anti-malarial measures in the City. The prevalence of malaria in the croweded parts of the City has been estimated and the method of its propagation, to a great extent elucidated. The most important question of the acquisition of garden lands close to the residential quarters in the 5th and 6th Divisions and the stoppage of wet cultivation therein has already been decided on. The public Health Committee will be requested to prepare a programme of other urgent anti-malarial measures that could be adopted in the crowded and insanitary parts of the City. The Council would emphasize their firm conviction that an up-to-date drainage and sewerage scheme for the City is of the first importance in malarial prevention. Further scientific investigation will perhaps become necessary as time advances, but does not seem to be strictly called for, at present, for the adoption of necessary anti-malarial measures.
